

**YORKSHIRE DALES NATIONAL PARK AUTHORITY
FINANCE AND RESOURCES COMMITTEE**

7th August 2006

SICKNESS ABSENCE

Purpose of the Report

To advise Members of the current level of sickness absence in the National Park Authority.

Strategic Planning Framework

The information contained in this report is consistent with the Authority's statutory purposes and its' approved strategic planning framework:

- ***Best Value Performance Plan***

"Plan and manage all aspects of the Authority's business so as to make the most effective use of our resources"

Scope of this Report

Analysis has been undertaken of sickness absence data covering all staff who were directly employed by the Authority during the period 1st April 2006 to 30th June 2006. The data has been categorised by individual Departments and is attached as an **Appendix** to this report.

Method of Calculation

As with previous reports, the Appendix presents data for all staff based upon a five day working week, taking into account vacant posts, bank holidays, and an average annual leave and flexi leave entitlement, to give 'actual' working days available, for both full and part-time staff.

The following data is provided:-

- (i) Number of staff in post as at 30th June 2006 (full-time equivalent)
- (ii) The total number of days lost due to sickness within the reporting period
- (iii) The total number of working days available within the reporting period
- (iv) The Department's lost time rate, which is the percentage of lost days compared with the number of days available, and is calculated as follows:-

$$\frac{\text{Total Number of Days Lost}}{\text{Total Number of Days Available}} \times 100$$

The Authority's lost time rate for the quarter ending 30th June 2006 was 2.3%. The rate for the previous quarter to 31st March 2006 was 3.1%. Also provided within the Appendix are details of the quarterly lost time rates over the last six years.

Best Value and Audit Commission Performance Indicator

Under the Best Value regime the Authority is subject to a national Performance Indicator showing the proportion of working days lost due to sickness absence.

Rather than reporting the annual lost time rate, sickness absence for Performance Indicator purposes is calculated and expressed as the number of day's absence per Full Time Equivalent (FTE) member of staff, as follows:

$$\frac{\text{Aggregate of lost working days}}{\text{Average number of FTE staff}} = \text{X days per FTE}$$

Calculated by reference to the start and end of the financial year

Summarised below is the Authority's performance relating to sickness as set out in the Best Value Performance Plan, over the past five years.

	TARGET	Actual 01/02	Actual 02/03	Actual 03/04	Actual 04/05	Actual 05/06
No of working days per employee lost due to sickness	4	5.9	4.7	5.7	4.57	5.2

As at the end of the first quarter (ending 30th June 2006), the Best Value Performance Indicator methodology (as opposed to the 'lost time rate', percentage-based approach) yields a figure of 1.2 days per FTE for that quarter.

The full-year target for 2006/07 is 4.5 days per FTE.

Number of working days lost due to sickness per FTE – comparative data

By way of comparison, the 2003/04 and 2004/05 figures published in the respective Best Value Performance Plans for other National Park Authorities have been added to the table below; 2006/07 figures will be collated for the next edition of this report.

Year	Broads	Dartmoor	Exmoor	Lakes	Northumberland	NYM	Peak	Dales
2003/04	7.8	9.15	10.4	4	8.64	4.26	9.13	5.7
2004/05	5.9	8	7.6	5.22	8.85	6.2	4.57	4.57

RECOMMENDATION

That the report be noted.

CASZANDRA PETERSON
SENIOR ADMINISTRATIVE OFFICER
