

THE DARK SKIES EXPERIENCE

Throughout February 2024 you can dive into a world where the underground meets the cosmos.

Explore our natural show caves and discover why astronauts train here – it's a space-like environment that challenges the senses, teamwork, and communication, just like on the Space Station.

DARK CAVERNS 2024
at Stump Cross

Travel back to 1963 when rocket scientist Geoff Workman spent 105 days underground, as a human guinea pig exploring isolation's effects in a controlled cave environment.

But that's not all. Our caverns are also a gateway to the stars. Step into the Yorkshire Dales' 'Dark Sky Reserve' for a breathtaking astronomical show. Peer through powerful telescopes, witness planets, stars, and distant galaxies up close.
